It allows you to create a small, convenient and handy program that provides the user with the ability to perform quick math calculations. It is developed on the python framework and has a friendly, easy-to-use interface. TinyCalc is a simple, accessible, quick and easy to use calculator written in Python. It is designed in the spirit of a

tiny micro-application that provides the user with the ability to perform basic arithmetic calculations.

TinyCalc supports Windows application deployment (Winforms, WPF) and can be used as a standalone application.

System Requirements:

.NET Framework 2.0 C#

Language Visual Studio

2008 CLR,.NET and

Python library

dependencies You should be aware that the program uses the .NET Framework,

visual studio 2008, and CLR to work properly.

Active Screen Shot

captures a screenshot of the desktop when a hotkey combination is pressed. It can capture screenshots at a specific time, or at regular intervals. You can use the interface to capture a screenshot of the entire desktop at a specified time, or simply trigger the screenshot within a specified time interval.

Active Screen Shot

generates a menu that

enables you to save all the captured screenshots to either a folder on the local PC or to a folder accessible via a network drive. JGrab.vbs is a script that logs into Remote Desktop servers. It runs through a specified list of IP addresses (or hostnames) to connect to them and grab the current desktop image. The script can be used to grab desktops from a Microsoft Terminal Services server with no problems and can

be scheduled to perform an automatic refresh at a set time with ease. It can also be used to grab all the desktops on the server (SSH port forwarding enabled), and to view the desktop remotely on your client machine. VMware Tools allows you to manage and troubleshoot VMware virtual machines. It provides the user with basic tools needed to perform virtual machine administration and maintenance tasks. The

tool contains native client drivers that can be used to connect to different VMware ESXi hypervisors. Runs on Windows XP, Windows 7, and later versions.

VMWare Workstation 6.5, VMware ESX Server 3.x, and later versions Requires the use of the native VMware tools installed on the host operating system to run properly. VMWare Tools 5.1 Requires the use of the native VMware tools installed on the host

operating system to run properly.

What's New in the?
