Mathematics cannot apply its findings to all aspects of reality including our universe. Let's say that our universe is a point of energy. If we know that energy is equal to motion and mass then we can determine the mass of the universe. According to the Plank constant, the mass of the universe is a great number equal to 1.4×10^{30} times the Avogadro constant. The Avogadro constant says that there are 6.022×10^{23} atoms in a mole. If that is true then the mass of the universe is approximately 1.2×10^{61} kg. If you divide 1.2×10^{61} by 1.4×10^{30} you will get that there are approximately 7.3
