Mori Calliope ( ) Asa Coco  
Live News.Q: Images  
rotated for all devices I  
have created a  
UIImageView object with  
the following storyboard  
properties Width Height  
the image is 270 points, it  
is 32 points lower than the

---

default size of the.png image, and it is 240 points bigger than the actual size of the image (which is about 270 points) so it shows just the top half of the.png image, it works on any size device. How can I make the image show the whole image so it is 270 points? Code NSString

---

```
*path = [[NSBundle
 mainBundle] pathForResource:@"imagename"
 ofType:@"png"]; NSData
 *data = [[NSData alloc] initWithContentsOfFile:path];
 UIImage *image =
 [UIImage
 imageData:data]; //
Finally display the image
_imageView.image =
```

---

image; A: You want to set the scale to match the intrinsic scale:

```
_imageView.image =  
[[UIImage alloc] initWithCo  
ntentsOfFile:path];  
_imageView.image =  
[_imageView.image resiza  
bleImageWithCapInsets:UI  
EdgeInsetsMake(5, 5, 5, 5)  
resizingMode:UIImageResi
```

---

zingModeStretch]; A: It may be a little late to answer this question, but I can confirm that the following will work for you:

```
NSString *path =  
[[NSBundle mainBundle] pathForResource:@"imagen  
ame" ofType:@"png"];  
NSData *data = [[NSData  
alloc] initWithContentsOfFi
```

---

```
le:path];  
_imageView.image =  
[UIImage  
imageWithData:data];  
[self.view  
addSubview:_imageView];  
Just set your imageView's  
frame to the size you want  
it to be, and it should be  
fine. Diabetes self-  
management: exploring
